Supporting and Strengthening the Role of Community Health Workers in Health Systems Development Thematic Working Group

healthsystemsglobal.org
The goal of this TWG is to support the generation, synthesis and communication of evidence on the roll out and functioning of community health worker (CHW) programmes and to enable learning across geographical and political contexts.

**Objectives**

- Raise awareness of the crucial role that CHWs play within the health system
- Bring together diverse individuals and networks to share knowledge
- Convene practitioners and decision-makers to better understand the challenges faced and encourage the use of the existing and emerging evidence in policy and practice
- Promote an institutionalized practice of monitoring interventions and evaluating results by all decision makers and practitioners
- Amplify the voices of community health workers and community groups
